Three Point Linkage

Small Frame

Built with optimum strength & durability in mind, the small frame range of three point linkage sprayers are the perfect blend of function & style.

Tank sizes are complemented by a matched pump size along with a 30m hose reel and quality pistol spray gun. Tank sizes 450, 600, 800 or 1000L can be fitted with boom widths from 4 to 12 metres. Units are supplied without boom refer to pages 20-26 for boom options.

Range features

Sight tube

Tanks feature wire reinforced clear sight tubes that are calibrated in 50L increments to give a clear reading of the tank volume.

Frame

Fully welded RHS frame with tubular construction using quality Australian made steel.

A frame pins

Industry standard 3 point linkage cat 2 pin system.

Three Point Linkage Medium Frame

The medium frame 3PL features a tough narrow profile RHS frame designed to keep the weight of the sprayer as close to the rear of the tractor as possible.

The medium frame 3PL unit comes with a host of standard features to make your spraying easier, safer and more efficient. Tank size of 1200L and can be fitted with the Twinlink manual fold boom, Krono Rowcrop boom or suspended Delta hydraulic boom. All units are fitted with electric controls, high capacity diaphragm pto drive pumps, three way filtration system, 45L flush tank, chemical transfer probe and an EZ control station. There are a host of options available to configure the unit to your specifications.

1200L with Krono boom

From

\$26,200

- Zeta 140 l/min pto pump
- 3 way electric controller
- Optional hose and gun
- 23L hand wash tank
- 12m Krono boom
- Venturi chemical probe
- Suction filter with 2 x pressure filters

Range features

Frame

Narrow profile RHS frame designed to keep the weight as close to the tractor as possible

EZ Control station

Simple pressure manifold station directs pump flow to venturi's and other ancillaries.

Handwash tank

23L hand wash tank with provision to store a liquid soap dispenser.

Filtration

A suction filter and two in-line pressure filters are fitted for optimum filtration.

1200L with Delta boom

From

\$39,000

- Zeta 140 l/min pto pump
- 3 way electric controller
- Optional hose and gun
- 23L hand wash tank
- 12m Delta boom
- Venturi chemical probe
- Suction filter with 2 x pressure filters

1200L with Crossover boom

From

\$24,550

- Zeta 140 l/min pto pump
- 3 way electric controller
- 23L hand wash tank
- 12m manual folding crossover with twinlink suspension boom
- Venturi chemical probe
- Suction filter with 2 x pressure filters

Other configurations available upon request

Range features

Fresh water tank

The 45L fresh water tank is plumbed through a 3 way ball valve to allow flushing of the system.

Top mount bottom fill

The top mount bottom fill enables the sprayer to be filled from a safe working height. This eliminates the need to fill the sprayer through the lid and minimises the chance of flow back.

Pump

Udor Zeta 140 pump features chemical resistant components such as desmopan for the pump diaphragms and stainless internal components. Standard with a 540 rpm pto drive.

Electric controller

Enables electric control of your boom sections and pressure adjustment from the tractor cab. Auto rate controller also available upon request.

Three Point Linkage

Large Frame

When a large tank capacity is a must look no further than the Large frame three point linkage range.

Available in tank sizes 1500, 1800 & 2000L with boom sizes up to 28 metres.

The unit incorporates a 100L rinse water tank to enable complete system flushing after use, this improves pump longevity and speeds up the decontamination process. For convenience all sprayer controls are done from the left hand side of the unit and feature intuitive well labelled controls.

A full filtration system is fitted with a large capacity suction filter and two in-line pressure filters.

A range of diaphragm pumps are available in either pto or hydraulic drive in sizes from 170 to 260 l/min.

Diaphragm pumps provide consistent volume and pressure and feature the most chemical resistant components such as desmopan for the pump diaphragms and stainless steel internal components ensuring long pump life and excellent pump performance. The standard control system fitted is a three way electric with electric pressure adjustment with a range of auto rate controllers available including a full ISO BUS system.

Booms range from the full hydraulic lift and fold Delta in sizes 15, 18, 21 & 24m and feature the Delta 3 way suspension system. For rugged terrain you could choose the robust TriTech boom in sizes 24 or 28m, for rowcrop spraying the multi fold Krono booms are available in 12 & 15m and provide single sided boom operation with multiple folding options.

1500L with Krono boom

From

\$35,185

- Large capacity tank 1500L
- 100L rinse water saddle tank
- 15m Krono Rowcrop boom with lift
- 1 x suction, 2 x pressure filters
- Robust full RHS frame
- Intuitive sprayer control system
- 3 way electric controls
- Zeta 170 pto drive pump
- Cat 3 linkage points

Range features

Pump

Udor pump features chemical resistant components such as desmopan for the pump diaphragms and stainless internal components and is standard with a 540 rpm pto drive.

Control station

Pressure manifold station directs pump flow to venturi's and other ancillaries.

Sight tube

Tanks feature wire reinforced clear sight tubes that are calibrated in 50L increments.

Filtration

A suction filter and two in-line pressure filters are fitted for optimum filtration

2000L with TriTech boom

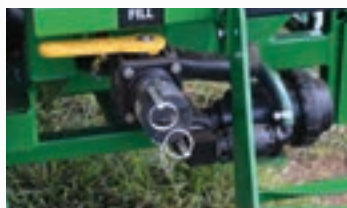

From

\$70,995

Shown with optional front mount tank

- Large capacity tank 2000L
- 100L rinse water saddle tank
- 24m TriTech boom with breakaways
- 1 x suction, 2 x pressure filters
- Robust full RHS frame
- Intuitive sprayer control system
- 3 way electric control system
- Zeta 170 pto drive pump
- Cat 3 linkage points

Range features

Top mount bottom fill

The top mount bottom fill enables the sprayer to be filled from a safe working height. Located at the side of the unit, the top mount bottom fill eliminates the need to fill the sprayer through the lid.

Large frame chassis

Full RHS construction cat 3 linkage encompasses either 1500, 1800 or 2000L tanks.

100L saddle tank

Mounted on top of the main tank and plumbed through a 3 way ball valve to allow flushing of the system.

Probe

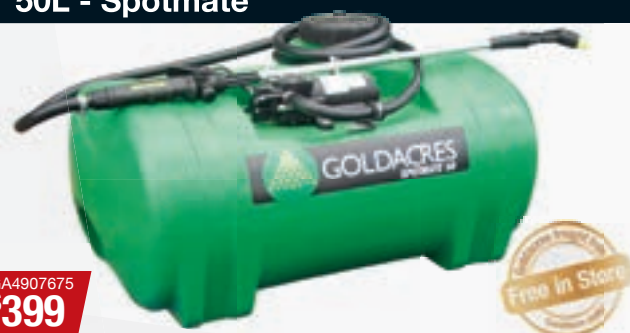

Chemical venturi is used to draw chemical into the tank. No raw chemical comes into contact with the pump.

12 volt sprayers

Spotmate sprayers are extremely versatile, with an on demand 12 volt pump, great for spraying around the home or garden.

Fitted with a high pressure Shurflo 12 volt pump, UV resistant poly tank, quality Marolex spray lance with an adjustable nozzle and 4m of hose. You can depend on the Goldacres Spotmate sprayers to get those spot spraying jobs done efficiently.

The Traymate is a heavy duty 12 volt sprayer designed for either spot spraying or adapting to operate a small boom.

Featuring a rotationally moulded UV resistant tank with a complete drain sump encased in a strong steel frame, a 12v Shurflo 6.8 l/min 107 psi pump, pistol grip spray gun, 5m of nitrile lined chemical hose, battery leads with battery clips and an agitation tap that can be used to return flow to the tank for mixing or reduce flow to the gun or boom. If you need to add a small boom or boomless nozzle the 200 and 400L units are available with a larger pump and pressure regulation valve and gauge for accurate spray application (Boom ready). Gun accessories ref page 27.

Traymounted sprayers

Heavy duty, versatile ute or trailer mounted high pressure sprayers designed for small booms or spot spraying.

Looking for extra pressure and spray volume? These units feature a 40 l/min 580 psi diaphragm pump with a Honda engine, UV resistant poly tank with complete drain sump, strong RHS frame, 30m steel hose reel with pistol grip gun and an adjustable nozzle. The Traymount sprayer comes with a host of practical features to make your spraying tasks safer and easier. For boom options refer pages 19-21.

Pro-Reel™

Pro-Reel® stand alone - Transform an existing tank and pump into a weed-killing weapon. Simply add a Pro-Reel® to your outfit and take the work out of spraying.

The Pro-Reel® is a remote controlled automatic rewind hose reel featuring "silent drive" technology, a powerful 12v electric motor combined with a 12.5:1 reduction belt drive system. This layout eliminates the need for clutches or lubrication and allows the reel to be rewound without the spray pump operating. The belt drive also acts as a safety mechanism, providing drive slip in case of overloading such as the hose being caught around a tree. The silent drive system provides the operator with virtually years of maintenance free operation. The reel comes in 2 sizes, 100 and 150m hose lengths and features a 2 channel hand held remote control unit for remote engine shutoff and hose reel rewind range of 200m.

300L - RTV300

The RTV300 is designed to fit into most rugged terrain vehicle tubs or in the back of a ute.

Designed with operator safety and convenience in mind the RTV300 features a forward mounted 300L chemical tank for extra stability. In addition a rear mounted single 100m Pro-Reel® is fitted and provides a compact layout suited to most RTV vehicle tubs. The petrol engine driven pump is rated at 40 l/min @ 40 bar (580 psi), this allows the operator to apply large volumes of chemical over a large area in a very short amount of time. Excess flow from the pump is used to keep the chemical tank well agitated, ensuring a good even chemical to water mix at all times.

Pro-Reel®

Single Reel

POWERED by
HONDA

GX
Engine
3
YEAR
WARRANTY

Designed for the professional spray operator, the Pro-Reel® is fitted with a high pressure diaphragm pump, 100m Pro-Reel® remote auto rewind hose reel & quality components.

The Pro-Reel® single is a tray mounted sprayer range ideal for high pressure spraying duties. Available in tank sizes 400 & 600L with a tank sump for complete tank drain and compact dimensions to suit many tray back applications.

Spray control is via a manual regulation valve with manual taps and a suction filter with a shut-off valve fitted across the range.

All units feature a Honda GX200 with a 40 l/min 580 psi high pressure diaphragm pump. Sprayers are complemented by the 100m Pro-Reel® remote auto rewind hose reel and fitted with a turbo 400 spray gun and adjustable spray trigger which is both light weight and capable of high flow rates. The 400L unit features a compact frame with dimensions to suit many current twin cab utes.

400L - Pro-Reel single

600L - Pro-Reel single

Tank	Part No.	Reel	Hose	Engine	Pump	Gun	L	W	H	Net weight
400L	GA4914045	100m	Nylon Grade 12	Honda GX200	40 l/min 580 psi diaphragm pump	Turbo 400 with adjustable spray trigger	1390mm	1030mm	885mm	178kg
600L	GA4914050	100m	Nylon Grade 12	Honda GX200	40 l/min 580 psi diaphragm pump	Turbo 400 with adjustable spray trigger	2087mm	1400mm	835mm	230kg

Range features

Remote

Powerful 2 channel hand held remote control unit with a range of 200m. The unit can control both the rewind function of the reel and the spray pump engine shutdown. An additional control at the base unit also can be used to wind the reel in case of a damaged or misplaced remote.

Spray hose

Nylon 12 hose is the toughest, anti-kink hose available. With an OD of 10mm and a thin wall it enables 100 or 150 metres of hose to neatly fit to the reel while providing minimal pressure loss. This hose is ideally suited to the Pro-Reel® due to its high pressure rating and super slip outer surface.

Pro-Reel™ Twin Reel

The Pro-Reel® twin is a tray mounted sprayer ideally suited for high pressure spraying duties requiring two operators.

Available in tank sizes 600 & 800L with a tank sump for complete tank drain and compact dimensions to suit many tray back applications. Spray control is via a manual regulation valve with manual taps and a suction filter with a shut-off valve fitted across the range.

Featuring the reliable Honda GX200 with a 40 l/min 580 psi high pressure diaphragm pump.

All units are complemented by twin 100m Pro-Reel® remote auto rewind hose reels and fitted with twin turbo 400 spray guns with adjustable spray trigger. As an added safety feature all Pro-Reel® twin units are fitted with a hand wash tank and soap dispenser.

Range features

Controller

3 way manual controller features pressure regulation and a complete bypass flow dump valve for easy engine starting and precise pressure adjustment.

Honda motor / pump

Udor high pressure diaphragm pumps are used across the range. The pumps are perfectly matched to suit the desired tank size and sprayer configuration and are coupled to the Honda engine via a 6:1 reduction gearbox. This pump and motor combination delivers an excellent mix of reliability, pressure and spray volume.

12 volt trailed sprayers

100L - Spotmate trailer

Great for spot or boom spraying around the garden behind your ride on mower.

The Spotmate trailer comes with a 100L UV resistant rotationally moulded poly tank, high pressure Shurflo 6.8 l/min – 107 psi pump, quality Marolox spray lance with adjustable nozzle. A regulation valve can be used to isolate

the flow to the gun or boom. The trailer features an RHS frame with a single pin hitch and 8" (390mm OD) turf wheels with fully sealed bearings.

600L model with 6m boom shown

Large frame - Prairie Compact trailers

The versatile **Prairie Compact** trailed sprayer is built on a strong platform to handle many popular options and configurations.

- 1000, 1500, 2000 or 2500L rotationally moulded UV resistant poly tank with complete drain sump
- Strong chassis with narrow pull
- Udor 70 or 85 l/min 290 psi diaphragm spray pump with choice of pto, hydraulic or Honda engine drive.
- Pressure manifold – simple and intuitive to use
- 45L flush tank plumbed through 3 way ball valve
- 3 way filtration system
- 3 way electric controller with electric pressure adjustment or Raven auto rate controller
- 10m manual Crossfold boom or 12m Crossover boom with Twinlink suspension

Chemical handling

800L - Batchmate

The Batchmate allows you to mix and agitate chemicals in preparation for loading into your sprayer - speeding up the loading of powders or granules.

Fitted with a high capacity 3" poly pump and powerful twin agitation system, the Batchmate delivers maximum chemical agitation and high tank fill rates.

- Open flow pump capacity of 610 l/min drawing from Batchmate tank (open flow from pump alone is approximately 1010 l/min)
- 25 metre maximum pump head
- 3" camlock main fill and delivery points
- High capacity venturi with chemical induction probe
- Twin tank lids for easy cleaning and loading
- Drumbuster for rapid loading of drums
- Pressure gauge
- 23L hand wash tank with soap dispenser

60L - SuperFlow mobile hopper

The SuperFlow Mobile Hopper is an alternative method of transferring chemical into the main spray tank.

GA4914535
\$2995

- 60L hopper capacity
- Dry chemical friendly - Atrazine & Simazine
- Approximately 50 l/min induction when using a 50 psi pump (suitable for most fire pumps 1½" or larger).
- Drum rinse nozzle
- Anti-aeration mixing jet
- Volume indicator
- Easy grip Banjo fittings
- Fully sealed lid
- Sturdy welded frame
- 8" (390mm OD) pneumatic tyres
- Heavy duty 1" axle and bearings
- 5m suction hose and 2m induction hose
- Camlocks for rapid fitting
- 779 L x 670 W x 1145mm H

Nozzles

Boomless

Boomless nozzles

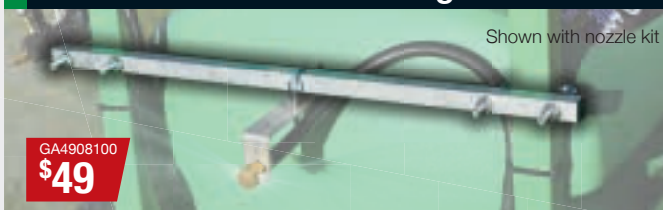

Boomless nozzles are used for spraying areas not easily accessed with a boom.

Choose from single brass, stainless steel, nylon nozzles or the double sided BoomJet suited for large capacity 12 volt or medium pressure diaphragm pumps.

Boomless nozzles can spray widths from 3 to 19 metres and can be supplied as individual nozzles or as a complete kit including mounting bracket and fittings.

Boomless nozzle mounting bar

Shown with nozzle kit

GA4908100
\$49

Ideal for mounting boomless nozzle kits, suit 650mm upright posts found on all Goldacres sprayers up to 2000L Compact Trailer. Includes: 1 x 800mm aluminium mount bar and 2 x u-bolts M12 90 x 120mm

Solenoid kit

- Electric solenoid on/off control.
- Cigarette switch with 2 core wiring loom
- Kit complete with 12 volt solenoid and 1/2" hose tails.

GA5023760
\$229

*All spray widths calculated with nozzle mounted 900mm above target

Booms

Manual

2m Towbar

Simply slide into a Hayman Reese style towbar, lightweight aluminium booms are great for use on RTV's and utilities. Fully adjustable vertically and horizontally. Spray coverage of 2m wide. Compact storage when not in use.

GA4908615
\$499

Boom when folded

Mount	Hayman Reese style 50 x 50mm
Construction	Lightweight aluminium
Nozzles	4 x IDK120-02 (yellow)
Nozzle body	TeeJet non-drip
Adjustability	Adjustable boom height (330mm)
	Adjustable towbar length (5 x 90mm increments)
Fittings	3m of 12mm hose and clamps
Weight	6 kg net
Part No	GA4908615

2m Roadside towbar (with fenceline nozzle)

Simply slide into a Hayman Reese style towbar, lightweight aluminium booms are great for use on RTV's and utilities. Fully adjustable vertically and horizontally. Spray coverage of 2m wide. 4.8m wide spray coverage when mounted 1.22m high at 2.76 bar.

Booms

10m manual

Manual folding booms 10m

These booms have forged a reputation in the spraying industry as the strongest design with great standard features.

An RHS construction is used and all booms feature spring loaded fold mechanisms to allow break back if you strike an object. Greasable hinges are used to further increase the boom longevity. Suited for Small frame 3PL units, the booms all feature stainless steel nozzle brackets mounted behind the boom structure for protection and are fitted with non-drip nozzle bodies.

Free In Store

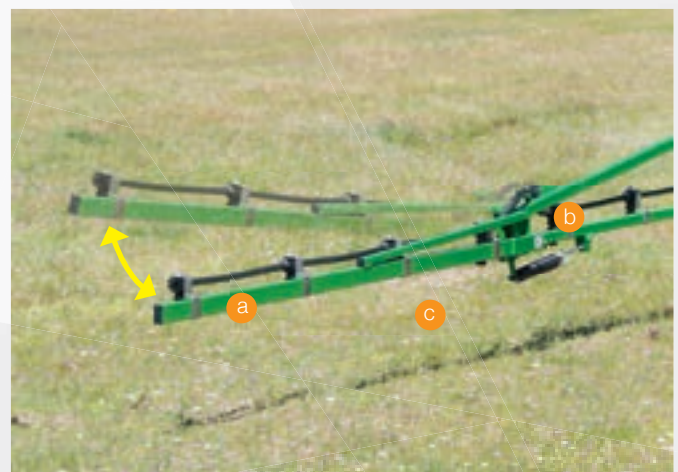

Manual folding Crossfold booms 10m

The manual folding cross fold boom is constructed using Australian made mild steel in a fully trussed configuration. The trussing gives the boom superior strength and durability for when the going gets rough. The inner wing to centre section connection points are fully bushed and greasable to prolong its working life. The outer wings feature a spring back mechanism to protect the boom in the event of a collision. Non drip nozzle bodies are mounted behind the boom for added protection.

Hinge

Greasable bushed hinges fitted throughout boom.

Breakaway

- (a) 2D breakaway end tip with (b) rubber mounted stopper (Crossfold only).
(c) Stainless steel nozzle brackets position behind boom wing.

Boom supplied with nozzle bodies, caps, IDK120-02 nozzles and strainers. Supplied with u-bolts and nuts for mounting to your sprayer. Width of the boom is the effective spray cover*

***The nozzles supplied with these booms may not suit all chemical applications. Always ensure that the nozzles fitted match the recommended spray quality as stated on the chemical label.*

10-12m Crossover

Manual Crossover Twinlink suspension boom 10 & 12m

The manual folding crossover boom with twinlink suspension allows the boom to float over the roughest terrain, keeping the boom level.

This is important as the quality of the spray job can be greatly effected by the boom being either too high or too low to the target. In addition, boom longevity is greatly improved because the roll stresses are absorbed by the suspension system.

10m	12m
GA4908480	GA4908490
\$8785	\$9755
Net weight 230kg	Net weight 240kg

Free in Store

Centre boom section with Twinlink suspension

(a) The boom structure floats on twin links which are supported by greasable sealed roller bearings. The angled links provide self levelling properties without the need for springs. (b) Rubber roll stoppers provide cushioning in the event of the boom reaching full travel. (c) A dampener connected between the mounting frame and boom limits rapid roll oscillation. (d) The connection between the suspension system and the three point linkage is via polyurethane bushes. The bushes help maximise shock absorption. (e) Poly slide strip helps transfer yaw forces whilst still allowing the boom to roll freely

Boom end

(a) 2D breakaway end tip with (b) rubber mounted stopper. (c) Stainless steel nozzle brackets position behind boom wing.

Booms

Vertical fold

Hydraulic vertical fold boom 10m

Boom centre section

(a) Large capacity 2.5" hydraulic cylinders with 16" stroke provides nearly 90 degrees of wing rotation. This allows the tallest of obstacles to be avoided without deviating from the desired travel path or row. (b) Outer section of the boom features a break back mechanism in case of a collision. The break back feature also doubles up as the outer wing fold to reduce the folded height.

Compact folded width

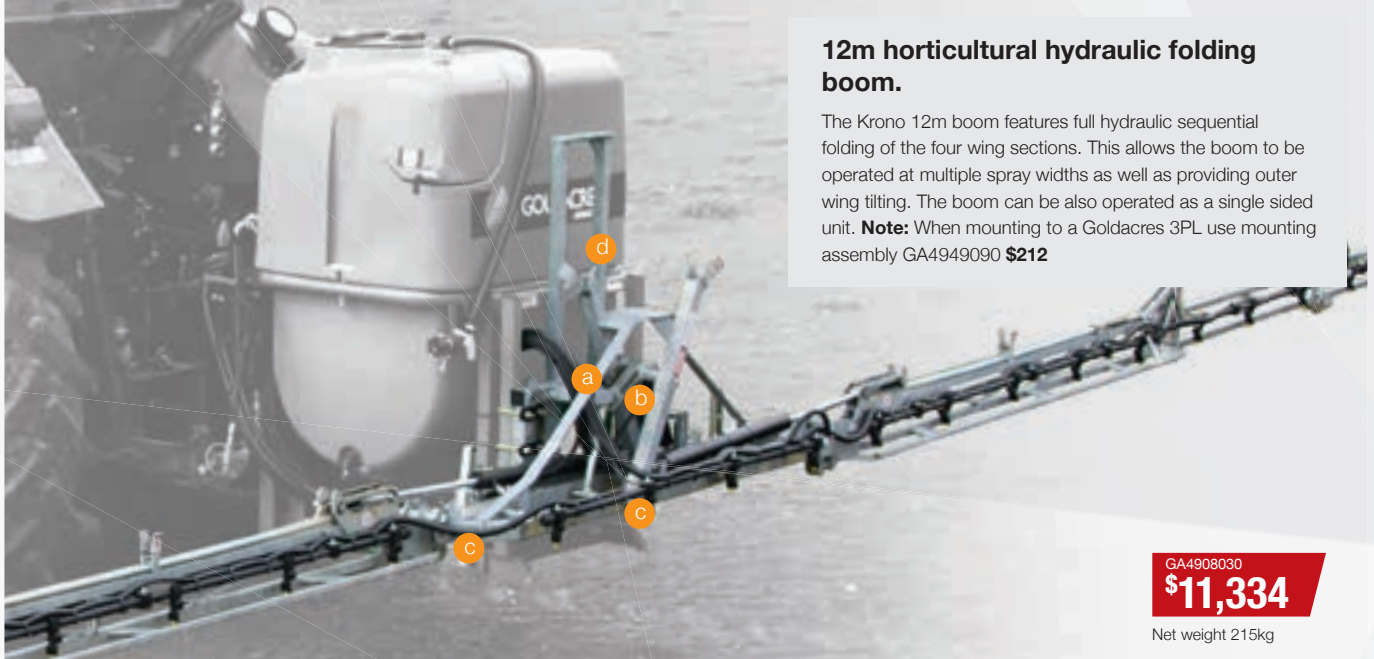

Boom end

(a) 1D breakaway end tip. (b) Boom end frame with plumbing mounted to protect nozzles from damage.

Krono 12m

Hydraulic Krono 12m

12m horticultural hydraulic folding boom.

The Krono 12m boom features full hydraulic sequential folding of the four wing sections. This allows the boom to be operated at multiple spray widths as well as providing outer wing tilting. The boom can be also operated as a single sided unit. **Note:** When mounting to a Goldacres 3PL use mounting assembly GA4949090 **\$212**

GA4908030
\$11,334

Net weight 215kg

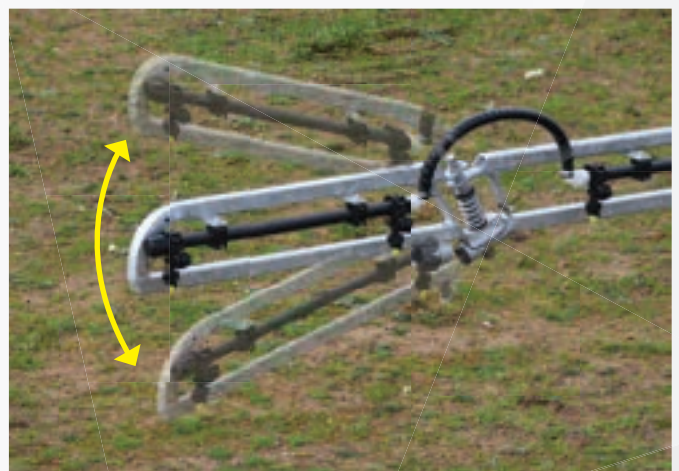

Boom centre section

(a) Self levelling suspension system with optional slant cylinder (GA5023540 **\$635**) helps the boom float over rough terrain. The optional slant cylinder can be used to adjust the boom level when traversing the side of a hill. **(b)** Each side features one long stroke hydraulic cylinder coupled with outer wing sliding rods to enable complete mechanical sequential folding. This cleaver system reduces the amount of hydraulic tractor remotes required to operate the boom. **(c)** When one side is folded the self levelling suspension is locked out. This avoids the open side from tilting downwards. **(d)** Optional hydraulic lift can also be fitted providing 900mm of travel.

Hydraulic fold

Individual hydraulic fold can be used to tilt boom wings.

2D boom end

The outer wing features a break back / forward spring loaded mechanism to prevent boom damage in case of a collision.

Booms

Krono 15m

Hydraulic Krono 15m

15m horticultural hydraulic folding boom.

The Krono 15m boom features full hydraulic sequential folding of the six wing sections. This allows the boom to be operated at multiple spray widths as well as providing a very compact folded structure. The boom can be also operated as a single sided unit. **Note:** When mounting to a Goldacres 3PL use mounting assembly GA4949090 **\$212**

GA4908035

\$17,588

Net weight 510kg

Boom centre section

(a) Self levelling suspension system with standard slant cylinder helps the boom float over rough terrain. The slant cylinder can be used to adjust the boom level when traversing the side of a hill. (b) Each side features one long stroke hydraulic cylinder coupled with outer wing sliding rods and cables to enable complete mechanical sequential folding. This cleaver system reduces the amount of hydraulic tractor remotes required to operate the boom. (c) When one side is folded the self levelling suspension is locked out. This avoids the open side from tilting downwards. (d) Hydraulic boom lift allows taller crops to be sprayed.

Boom fold

Unique boom fold design. Cylinder extends rods to unfold boom wings individually, cable with spring mount provides some vertical wing suspension.

2D boom end

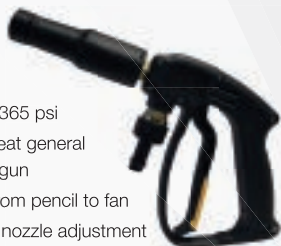

The outer wing features a break back / forward spring loaded mechanism to prevent boom damage in case of a collision.

Compression / Rechargeable sprayers

Compression

Hobby range

Perfect for spraying plant protection chemicals and liquid fertilisers in orchards, nurseries, plantations and gardens.

Featuring high quality, durable and chemical resistant materials the Hobby models are practical, reliable and easy to use. Available in tank sizes 5, 9 & 12 litres.

Master / Industry range

Designed for demanding tasks in garages, car washes, service points and in various branches of industry.

The Master & Industry sprayers are resistant to many chemicals and detergents. Featuring an acid-proof stainless steel telescopic lance with adjustable nozzle, Viton seals, together with an extremely durable high-pressure container guarantees that the device withstands the harshest of environments. Available in tank sizes 2, 5, 9 & 12 litres.

Accessories

Three or five nozzle horizontal boom

Add a boom to your Marolex sprayer for spraying broad leaf weeds or where greater spraying width is required

\$349

- 30L tank
- UV resistant tank
- 3m hose
- Telescopic lance
- 3.5 l/min 12v pump
- Net weight 14kg

Rechargeable sprayers offer up to 6 hours of continuous spraying. Featuring high flow & pressure 12 volt pumps, telescopic lances, all made with the most durable materials in a range to suit many applications.

Vacuum pump

12L
GA5021800
\$145

Vacuum pump is a multi-purpose device used for vacuuming many types of liquids. It is ideal in a service environment where draining liquid is difficult e.g. oil from engines or chemical from containers. The Vacuum pump has a strong 12L polypropylene tank with a steel ball valve and a high flow capacity to draw liquid with ease.

Foamers

Foam applicator, the ultimate cleaning tool. Change the density of the foam through three interchangeable inserts.
