When frame or other welding is required on the sprayer, refer to Operatetor's Manual for full proceedure and these precautions are to be taken to protect the electronic control components:

- Disconnect transmission computer located on top of the main transmission pump.
- 2. Disconnect the 2 computors located in the cabin fuse box compartment.
- Disconnect the battery connections. Cover electronic control components and wiring to protect from hot sparks etc.
- Do not connect welding cables to electronic control components.

The nozzles supplied with this boom may not suit all chemical applications. Always ensure that the nozzles fitted match the recommended spray quality as stated on the chemical label.
